

Environmental Policy

NEC Infrontia aims to contribute to the health of communities around the world through environmentally responsible manufacturing and marketing based on our environmentally conscious technologies.

1. Based on an accurate environmental impact assessment of all the areas relating to the company's activities, products and services, we contribute to promotion of environmental activities including global warming prevention, resource saving, reduction of waste and strive to offer environmentally conscious products (Green Products).
2. We observe strictly environmental regulations and rules stipulated by the government/local government and other requirements agreed by NEC Infrontia, which are related to all our business activities.
3. To promote the environmental management activities, we establish environmental management system, set up environmental objectives and goals, implement them with periodical reviews and continuous improvements, and strive to prevent pollution.
4. We keep all the people working at and working for NEC Infrontia fully informed of this policy to ensure its steady implementation and maintenance.

Established April 1, 1994
Revised June 18, 2010
